

Airstop Cleaning Agent for Adhesives

DESCRIPTION

This special cleaner is a product based on natural substances for the effective removal of adhesive residue, remains and marks of rubber, oil, grease, resin, tar, paint, pencil marks, pen and felt-pen ink from surfaces, labels from glass and window frames, etc., and for cleaning industrial machines as used by tradesmen, in window installation, the plastics industry, the tyre industry, construction companies, etc.

BENEFITS/USAGE

- PH-Neutral
- Free from CFCs & CHC
- 100% biodegradable
- Quick drying of treated surfaces

APPLICATION

Spray **Airstop Cleaning Agent for Adhesives** onto the soiled surface and gently clean with a cloth or a soft brush. Allow to soak in for a while and then wipe off.

TIPS

For removal of Airstop Adhesive Tape, use a hair dryer to soften the adhesive during removal. Use **Airstop Cleaning Agent for Adhesives** to remove the remaining residue. Adhesive should come off easily.
